Artist Collaboration  
Kansas City, MO

## Jeremy Knoll AIA, LEED FELLOW, SEED, ECODISTRICTS AP bnim ASSOCIATE PRINCIPAL | DIRECTOR OF SUSTAINABILITY AND REGENERATIVE DESIGN

Jeremy is an experienced leader at BNIM with a deep passion for green building, historic preservation, and social equity. As BNIM's Director of Sustainable and Regenerative Design, Jeremy guides project teams across BNIM to create positive impacts for human and building performance, develops new research and industry resources, and empowers staff, clients, and communities to take daily climate action.

Jeremy has been as an integral design team member on projects worldwide, leading sustainability, building performance, and green building rating systems. Among these projects includes the LEED Platinum certified collaborative office hub, Makers Quarter Block D in San Diego, CA; the LEED Platinum certified Bancroft School Redevelopment; the adaptive reuse of a historic Kansas City theatre into the Kirk Family YMCA; and the East Campus Framework and Master Plan at Washington University in St. Louis.

As a key leader of BNIM's Sustainability Group, Jeremy is a key contributor to BNIM's Sustainability Action Plan and annual sustainability report, *Subject To Change*. This work challenges the firm to improve tools, resources, and transparency in reporting and analysis of environmental impact across projects. His dedication to climate action extends to his volunteer work as a regional climate policy advocate and Executive Board member for the U.S. Green Building Council Central Plains, Climate Action KC, and Design Corps, the world leader of the Public Interest Design movement.

Jeremy is a SEED Professional, 2019 LEED Fellow, and BNIM's most recent EcoDistricts Accredited Professional.
