## Mark Neibling AIA

**bnim** ASSOCIATE | PROJECT ARCHITECT

Mark Neibling is an award-winning designer whose curiosity drives him to explore processes, systems, and technology to achieve the best possible integration. His collaborative team approach brings the best ideas to the surface and guides them to excellence through rigorous attention to detail.

Mark's wide-ranging design experience includes higher education, civic, mixed-use, and renovation and addition projects. Throughout his career, he has developed a broad knowledge of the specialty spaces within these facilities, including pools, medical simulation spaces, and both AV-intense and acoustically sensitive environments.

Through his work on renovation and addition projects, Mark has developed strong building envelope expertise. He addresses the challenge of connecting new to existing building envelopes by integrating detailing and proposed construction assembly methods early in the process. Most recently, he has applied this expertise to the Kirk Family YMCA, an adaptive reuse of the historic Lyric Opera building into a new community space in downtown Kansas City.
